Healthy, well maintained cool season grasses such as, but not limited to, Rye grass, Fescue, and Bluegrass pattern more easily. Warm season grasses such as Bermuda, St. Augustine and Zoysia do not pattern as well due to their coarseness. Please refer to the Zone Map, located below, as a reference.

Lawn Patterning Zones

1

Zone 1
Best Patterning

2

Zone 2
Better Patterning

3

Zone 3
Good Patterning

Results may vary based upon the type, length and health of grass.

It is important to have a healthy lawn in order to experience all of the benefits of the Toro® Lawn Striping System. Visual results may vary based upon health of grass, length of grass, type of grass, available sunlight and seasonal conditions. Toro recommends that the Lawn Striping System not be used when grass is dormant or is under stress due to drought or disease.
